

**OUTSTANDING
VERSATILE
UNIQUE...**

THE MODEL 750 HAS EVERYTHING GOING FOR IT

The model 750 has everything going for it from manual to hydraulic control...lid...side pattern kit...plus 2 styles of banding kits. All this, plus rigged construction to give you the service you need. You can control seed amounts down to 3 lbs. per acre and fertilizer from 50 lbs. to 1,000 lbs. per acre. Easy-adjusted pattern control enables you to center the spread of light or heavy material. 14 gauge steel hopper with welded seams - round hopper base prevents lodging of material and assures even feeding. Quick-Tach, shielded, telescoping power take-off shaft and gearbox for long, trouble-free use. Heavy cast-iron gearbox has tapered roller bearings, drop-forged gears and filled with oil. Gearbox is standard for 540 RPM but can be ordered for 1,000 RPM tractors also. Your answer for spreading all types of seed and fertilizer as well as salt and calcium on ice and snow. Ideal for narrow rows only 36" wide as the dimensions of the 750 are 22"X36"X49" high.

OPTIONAL EQUIPMENT

- #158 - Lime Agitator for spreading dolomite or dehydrated lime
- #217 - Brackets to convert Cat. 1 to Cat. 2
- #1090 - Small Seed Hopper for spreading alfalfa & clover with oats.
